

Full name : Abdelmoumin Boussag

Born: 08/05/2003 | **address:** M'Sila, Algeria

Email: momayne10@gmail.com | **number:** +213 667 12 39 87

Portfolio: momayne10-ship-it.github.io/Gmayne

Profile

Software Engineer holding a Master's degree in Networks and Information & Communication Technologies and a Bachelor's degree in Information Systems. Experienced in designing and developing enterprise and SaaS platforms, with particular attention to secure architecture and scalable system design. Skilled in professional AI prompt engineering, using generative AI tools to build intelligent, automated features that speed up workflows and improve product quality. Comfortable working across the full development stack, with a steady focus on keeping pace with evolving technologies.

Education

- Master's Degree — Networks and Information & Communication Technologies University of M'Sila, Algeria | 2024 – 2025
 - Bachelor's Degree (Licence) — Information Systems University of M'Sila, Algeria | 2022 – 2023
-

Core Capabilities

- Systems & Platforms That Accelerate Workflows — designing custom software that streamlines daily operations and removes manual bottlenecks.
- Platforms & Applications — end-to-end development of websites, platforms, and applications from architecture through deployment.
- Professional AI Prompt Engineering — leveraging generative AI to build intelligent automation and smarter product features.

- Scalable Architecture — systems engineered with security in mind, built to grow safely as the business grows.

Featured Projects

Full case studies and architecture details available in the portfolio.

- Medisys — Healthcare · Desktop & SaaS Enterprise platform for patient management, appointments, and electronic medical records.
 - NurserySys — Early Childhood Education · Desktop & SaaS Kindergarten/nursery management platform covering enrollment, attendance, billing, and parent communication.
 - E-Commerce Platforms — Digital Commerce Scalable storefronts with admin dashboards, payment integration, and product management.
 - CNR Digital Platform — Government / Institutional Digital transformation of national retirement file management with secure records and workflow automation.
-

Soft Skills

- Excellent English presentation & public speaking
 - Continuous learning & fast adaptation to new technologies
 - Effective communication with international, cross-cultural teams
 - Analytical thinking & structured problem-solving
-

Languages

- Arabic — Native
- English — Professional — excellent presentation
